

**LETTER OF RECOMMENDATION**

To whom it may concern,

It is with great pleasure that I am providing reference for Miss Rajashree Joshi who is seeking admission for higher studies at your university. As the Head of Application Platform and Services (APS), Bank of New York Mellon, I have guided Rajashree while she worked with Digital Transaction Engine (DTE) team at iNautix Technologies – A BNY Mellon Company.

Rajashree was recruited right after her under graduation and her sound technical knowledge, excellent programming skills and quick grasp on business knowledge made her best of the lot and she was selected for this pilot project. DTE is the key initiative of the bank for Trade capture, validation and settlement to market. She has demonstrated excellent communication and interpersonal skills as well as a great ability to interact in a culturally diverse environment. Team effort is imperative to us, and she fitted extremely well within the DTE team. Rajashree's sincerity, steadfast commitment and ability to focus on demanding tasks set her apart from other employees.

I have been impressed by Rajashree's attitude towards work and her consistent performance on her job. Rajashree was responsible for developing several key application components in the agile environment utilizing test-driven development (TDD). She is a critical resource for developing front-end solutions using AngularJS and is a key member of the development team. She has excellent hands-on experience of integration testing, working with various tools such as Jenkins (for building, deploying and monitoring projects), FitNesse (acceptance testing framework) and SonarQube (open source code quality management tool). Within a short span of time, she has acquired strong practices as an application developer and amassed good knowledge of latest front-end technologies.

Rajashree has conducted sessions on Front-End Web UI frameworks and tools for interns in the organization. She has also been an active part of Corporate Social responsibility cell at iNautix Technologies. She has participated in various campaigns organized at Pune Blind School an NGO supported by our organization and has instructed the physically challenged students in their academic curriculum.

I sincerely believe that she would excel in this program and be a true asset to your University. She has my highest endorsement. Please feel free to contact me if you have any inquiries regarding this recommendation or my endorsement of Rajashree, I will be glad to help.

Yours sincerely

Michael Goldverg  
Head – Application Platform and Services (APS)
