Letter of Recommendation

A clear thinking, level headed individual is how I describe Ms. Rajashree Achyut Joshi. This quality of hers became evident during my interaction with her, as a class teacher throughout her undergraduate program, Computer Engineering, in Vishwakarma Institute of Information Technology (VIIT).

My acquaintances with her, spread over three years, has given me an opportunity to observe her closely and judge her capabilities. During 2012-2015, I have taught her Digital Electronics and Logic Design, Digital Electronics and Logic Design Laboratory, Computer Graphics, Database Management System, Design and Analysis of Algorithm in the second year, third year and fourth year of her undergraduate program respectively. Through my observation, I would like to say that she is attentive, studious and always possesses a positive attitude towards academics.

As I was her guardian teacher too, I have witnessed her socioprofessional behavior, academic behavior and growth towards her aspirations. She is a keen observer and has requisite aptitude to take up any difficult assignment in the field of study she is passionate about. She has the high alacrity for learning new things and shown punctuality while submission of the assignments. During her third year, she has presented a "Simulation of Internal Working of Data Structures" in Sci-tech intra college project competition through ingenious user interface and was selected as one of the winners of the competition. A student with excellent ability for logical and intuitive thinking, she has proved herself to be a talented and brilliant student. She was consistent top ranked student in the department and felicitated for securing 3rd rank in the computer department in 2015. Her ability to understand a problem, to conceptualize and analyze a situation needs a special mention. Apart from being technically sound, Rajashree manifests excellent presentation and communication skills. She has shown a penchant for grasping and visualizing practical difficulties and this, per se, makes a potential research student.

As far as her extra-curricular activities are concern, Rajashree was the active member of National Social Scheme (NSS) team and played Department Head and Computer Education Activity Head for the year 2013-2014. This shows her team player nature and exhibit her leadership qualities. She has awarded with the "Best Committee Member" Award from the Team NSS in the year 2015. She has handled entire Food Department for Mega Blood Event happened in the College for the year 2013. Apart from social activities, she was vital member of college cultural team "Aavishkar" and was the part of dance team, clearly evinces her interest in creative sector.

I have the deepest personal and professional respect for her, and sincerely believe Rajashree will bring her unique energy, optimism, passion, and tireless creativity to your class and University as a whole. I am confident that She, as a student with great zeal for higher academic pursuits and aptitude for research, will do well. I strongly recommend her candidature for your graduate program. I wish her all the best for her future.

Letter of Recommendation

To Whom It May Concern:

It is my absolute pleasure to recommend Ms. Rajashree Achyut Joshi for graduate studies at your esteemed university. Over the last 16 years of my teaching experience, I have taught more than one thousand students, coming from varied backgrounds and possessing a wide variety of talents, abilities and personality traits. I would place Rajashree among the top 2 percentile of all the students whom I have taught. Rajashree has been my student for three years between 2012-2015, during which I taught her Data Structures, Data Structures Laboratory in her 2nd year, Data Structures and Algorithms in 3rd year and Programming Laboratory in 4th year of her undergraduate degree.

Based on my observations, I can attest that she is a highly intelligent, sincere and hardworking student with a tremendous drive to reach her goal. Her performance in Data Structures and Algorithm were exemplary, demonstrating her keen interest in programming and problem solving. Her ability to ask the right questions and conduct he own research and studies out of the classroom, not only helped facilitate enriching discussions in the classroom but also reflected her potential for research.

Rajashree, along with two other students, in her third year, worked on live in house project instead of doing project just for the academic requirements. I was the mentor and project guide for the in house project she was working on, "CGPA Calculation System". The project was based visual basic as front end tool and oracle as a backend tool. The application she worked on is helpful for entire department to calculate the Cumulative Grade Point Average of all the students and determining the percentile of each student. I observed Rajashree feeling personally responsible for learning, for understanding the requirements for the application and taking decisions by analytically studying the complex situations. I could see her working for long hours with her group members, read various publications and magazines in order to come up with new ideas. I amazed with her performance, diligence and dedication she has shown towards the project. Apart from willingness to learn, she led the group, educated other members in case of falling back and completed the application in short span of time. Nonetheless, she has good presentation and communication skills. She could superbly put forward her ideas in front of the experts during project presentations and seminars.

On a personal level, Rajashree is a well-rounded person, with a lot of enthusiasm for social work and extra-curricular activities. She has shown her adeptness at organizational skills, especially in a cross-cultural setting. She is approachable and easy to communicate with.

I concur with her decisions to pursue graduate studies and strongly recommend her for admission at your university.

Mrs. L. A. Bewoor
